| 45 | 13 | 13.5 |
| 46 | 77 | 78 |
| 48 | 7 |  |

FOOT MEASURING GUIDE

Foot Length

## EASY STEPS TO MEASURE

1. Place your feet on a piece of paper or align against the wall.
2. Mark the paper at the back of your heel and at the end of the longest toe.
3. Measure the distance between these two points in a straight line, \& repeat the same steps for the other foot.

If your foot is longer, use the larger measurement to find your shoe size by referencing the size chart above. If your measurement is in between sizes \& the shoes don't come in half sizes, please round up to the next size.
